

## OUTBACKER TRI-SPLIT - [ OB8TRI ]

### OUTBACKER TRI-SPLIT [OB8TRI]

**Price: AU\$ 399.00** [ incl GST ]

#### Features:

OUTBACKER 80M - 10M TRI-SPLIT. The go-anywhere mobile antenna - the unquestioned, all season, all climate, all terrain, HF mobile champion. This 1.8 metre tall antenna, (600 mm when packed) covers 80-75-40-30-20-17-15-12-10m, includes the WARC bands, and mates perfectly with all modern, 50 Ohm, HF transceivers. No antenna tuning unit or base matching device is needed. When combined with OUTbacker's, (OSB) heavy duty, spring base, the OB8 makes a very rugged and professional installation, which will last for years. Maximum power:- 300 Watts, PEP. A 3 piece split antenna with carry bag. ideal for the travelling executive wanting to stay in touch. All outbacker HF antenna are coated with the latest, strongest the most technology advanced thermal setting plastics. Our coatings have been well proven over 30 years. From the extreme cold winters in Alaska, to the harsh boiling temperatures of the Australian desert.

Our coatings have a lifetime guarantee against flaking or peeling whilst still maintaining maximum flexibility, durability and ruggedness.

previous

OUTBACKER Heavy duty spring and base, combination. The antenna screws to top of the spring via the standard amateur thread size 3/8"x24 tpi. The chrome plated brass base mounts to the vehicle via a 1/2" BSW bolt.(1/2"UNF USA) The Heavy duty Stainless steel spring screws onto the base, via a bsw thread. Connection from the transceiver to the spring base is via coax cable (optional) terminated with PL259 plugs. Construction is of chrome plated brass and stainless steel spring.
